Q3 prospects

Thierry Navarre, CEO
Q3 prospects

- Considering the persisting uncertainties related to the pandemic and its impacts on our business, in particular on the evolution of demand in our markets, we are not in a position to provide projections for the balance of 2020. In this challenging context, we remain focused on supporting our customers and improving our operating performance.

- The fluff pulp index has increased sequentially (in US Dollars) since early this year, which will have a limited impact on our purchasing prices. The most recent indices for oil-based derivatives show sequential increases following downwards trends earlier in Q2. However, these indices remain below the levels of prior year.

- At current rates, we expect the year-on-year negative impact of currency depreciations on reported revenue and Adjusted EBITDA in Q3 to be similar to the impacts reported in Q2.
Evolution of raw material indices

Oil derivatives tending down until recently; fluff pulp rising sequentially
Unfavorable devaluations started in February 2020

- Impact was **€38.3 million on H1 Group revenue**, primarily attributable to a depreciation versus the euro of the Brazilian Real and Mexican Peso, and to a lesser extent the Turkish Lira, Polish Zloty and Russian Ruble.

- The evolution of these currencies against the euro also explained most of the **-€31.7 million impact on H1 Adjusted EBITDA**
The following alternative performance measures (non-GAAP) have been included in this presentation since management believes that they are widely used by certain investors, securities analysts and other interested parties as supplemental measures of performance and liquidity. The alternative performance measures may not be comparable to similarly titled measures of other companies and have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of our operating results, our performance or our liquidity under IFRS.

- **Like-for-like revenue (LFL):** Like-for-like revenue is defined as revenue at constant currencies excluding change in perimeter of consolidation or M&A.

- **EBITDA and Adjusted EBITDA and related margins:** EBITDA is defined as earnings before net finance cost, income taxes, depreciation and amortisation. Adjusted EBITDA is defined as EBITDA plus non-recurring income and expenses. EBITDA and Adjusted EBITDA margins are EBITDA and Adjusted EBITDA divided by revenue.

- **Net financial debt/LTM Adjusted EBITDA ratio (Leverage):** Net financial debt is calculated by adding short-term and long-term debt and deducting cash and cash equivalents. LTM adjusted EBITDA is defined as EBITDA plus non-recurring income and expenses for the last 12 months (LTM).

- **Non-recurring Income and expenses:** Non-recurring income and expenses are defined as those items that are considered to be non-recurring or unusual because of their nature. The non-recurring income and expenses relate to:
  - acquisition-related expenses;
  - changes to the measurement of contingent considerations in the context of business combinations;
  - changes to the Group structure, business restructuring costs, including costs related to the liquidation of subsidiaries and the closure, opening or relocations of factories;
  - impairment of assets and major litigations.
